1. Foreword

a. AlpenChemie's Vision

To ensure the efficient use of water and energy resources through our innovative solutions and sustainable technologies; to lead the industry by providing environmentally friendly, reliable, and high-performance chemical products to various industries.

Our goal is to become a globally recognized brand that makes a difference by focusing on customer-centric approaches and principles of sustainability shaping the future. At **ALPENCHEMIE**, we are committed to protecting natural resources while creating long-term value for our business partners.

b. The Founder's Industry Experience

AlpenChemie is a pioneering company in industrial chemicals and water treatment, meeting industry needs with innovative solutions and a sustainability-focused approach. Under the leadership of our founder, this vision has been further strengthened in the fields of mining and energy. With years of industry experience, we deliver high efficiency and effective results to our customers.

c. The Story of AlpenChemie

AlpenChemie was founded with the mission of providing innovative industrial chemical solutions. Our founder's global expertise in the mining and energy sectors has been utilized to develop groundbreaking products and sustainable approaches. Today, AlpenChemie's products are trusted worldwide.

d. Foundation Principles

ALPENCHEMIE was established with a strong vision and an expert team to deliver innovative solutions in water treatment and industrial chemicals. Built on principles of customer-focused service, environmental sustainability, and industrial excellence, we have developed enduring partnerships and become a value-creating solution provider for industries since 2012.

e. Innovative Approach and Major Projects

AlpenChemie continuously seeks innovation to meet the evolving needs of the industry. Our advanced R&D infrastructure and expert team enable us to develop innovative products that enhance industrial efficiency while minimizing environmental impacts.

Significant projects include:

- **ALSCALE MINE**, an antiscalant specifically designed for gold mining.
- High-performance flocculant products under the **MINE AID** series.
- Specialized chemical solutions for reverse osmosis systems and industrial applications.

2. Our Services

a. Chemical Supply

ALPENCHEMIE offers an extensive range of products for water treatment and industrial applications, known for reliability and quality.

i. Continuous and Quality Production

We provide sustainably and high-standard-produced chemical products tailored to meet customer needs. Our production processes prioritize quality control, ensuring a seamless supply chain.

ii. Custom Formulations

To address the unique needs of various sectors and applications, we develop custom-formulated chemical solutions. These formulations are designed to enhance efficiency and operational success.

b. Equipment Supply**i. Dosing Systems and High-Tech Equipment**

Our dosing systems and high-tech equipment enhance the efficacy of chemical products. Customizable solutions address the specific needs of diverse industries.

c. Technical Support and After-Sales Services

Through on-site consultancy and process optimization, we ensure customer satisfaction at every stage.

i. On-Site Consultancy

Our professional team evaluates your facility, identifies challenges, and offers effective solutions to maximize operational safety, efficiency, and sustainability.

ii. Process Optimization

We analyze your systems to develop methods that minimize energy and chemical usage while maximizing performance, reducing costs, and supporting long-term sustainability.

3. Our Sectors

a. Mining Industry

Site-Specific Solutions

We offer tailored formulations like **ALSCALE MINE**, **MINE AID**, and **POLY LEACH** that enhance efficiency and reduce costs for gold mining and other operations.

i. Environmental Benefits

Our products support water recovery, waste minimization, and compliance with environmental standards, contributing to a sustainable future in mining.

b. Power Plants

i. Water Treatment Technologies

Advanced water treatment solutions enhance operational safety and efficiency for power plants, extending equipment life and preventing disruptions.

ii. The Role of Chemicals in Energy Efficiency

Our products prevent scaling and corrosion, optimize energy use, and provide both economic and environmental benefits.

6. Investing in the Future: Sustainability and Technology

a. Eco-Friendly Approaches

Our chemical products are formulated to conserve natural resources while offering high efficiency and low environmental impact.

b. Innovative Product Development

Our R&D team continuously develops products that enhance performance while reducing operational costs, supporting both technological and environmental sustainability.

c. Solutions for Global Markets

By extending our local market expertise globally, **ALPENCHEMIE** aims to become a trusted partner in international markets, offering tailored and innovative solutions.
